First time stopping at this cafe in accordance with the typical culture of the Ambon area who likes to make small talk while enjoying a cup of coffee... The service is super good, there is a question and answer side, not only in regional or Indonesian languages, but they also serve in English, there are also various books provided. for visitors to read, the location is right under the Mandala Multifinance building next to the Prosperous Church right on the side of the main road... For those who want to hone their English skills, both beginners and those who are already advanced, you can practice at this place because the concept of this cafe is to share the language.
